

The diagram illustrates a complex terminal block assembly. It features several modules arranged in rows and columns. The top row includes modules labeled E 93, E 210, and D001 A 12.5. Below these are more D001 A modules, some with different pin counts (e.g., -f5, -f6, -f7). The bottom section shows two D002 modules. Each module has a grid of pins, some of which are connected by wires or jumpers. The entire assembly is shown from a perspective view, highlighting its three-dimensional structure.
